

Figure 4: QUBO to Ising Hamiltonian Mapping

$$T^{\{\xi_k\}}(\alpha, n) = \max(T_{\text{off}}, T_{\text{loc}})$$

$$T_{\text{off}} = T_{\text{tx}} + T_{\text{c\_edge}} + T_{\text{rx}}, \quad T_{\text{loc}} = (1-\alpha) \cdot c_k / f_{\text{loc}}$$
